

Glen Lerner & Associates Assisting Those Affected by Accutane

Side effects from taking Accutane can be severe, law firm of Glen Lerner & Associates providing information.

Las Vegas, NV ([PRWEB](#)) October 20, 2011 -- The law office of [Glen J. Lerner & Associates](#) is assisting personal injury victims with many dangerous drug claims, including consumers who have suffered side effects from using Accutane.

Accutane (Isotretinoin) is a drug created by Hoffmann-La Roche to treat mild to severe acne in adults. [Hoffmann-La Roche](#) has included warnings that the medication has caused severe side effects in some cases, most commonly inflammatory bowel diseases such as Crohn's disease and ulcerative colitis, but also depression and severe birth defects.

Some patients have developed inflammatory bowel diseases to such an extreme, that they have had sections of their intestines surgically removed. This was discussed in the case of Andrew McCarrell v. Hoffman-La Roche Inc., et al., No. ATL-L-1951-03 MT, New Jersey Superior Court (Atlantic County), where a jury ordered the company to pay over \$25 million to a single plaintiff due to their negligence.

For more information about ongoing Accutane lawsuits, Glen Lerner & Associates can be reached at 1-877-GLERNER (1-877-453-7637) or by filling out the confidential contact form at www.GlenLerner.com.
