

Gladinet to Provide 1TB of Free HP Cloud Object Storage

Gladinet provides online collaboration, file storage, team workspaces and backup solutions with 1TB Free HP Cloud Object Storage for small and medium enterprises. The solution is also brandable with relocatable infrastructure.

FORT LAUDERDALE, FLORIDA ([PRWEB](#)) October 02, 2012 -- Gladinet has announced that for a limited time, it will include 1100 GB of free [HP Cloud Object Storage](#) with each new Team Edition account as it collaborates with HP to provide collaboration, file storage, backup and team workspace solutions using HP Cloud Object Storage. This solution will be provided by the [Gladinet Cloud with HP Cloud Services](#) and the 1100GB remains free until the Gladinet Cloud account is closed.

HP Cloud Object Storage provides a way to store and retrieve objects in a highly redundant cluster of publicly accessible physical machines. Gladinet Cloud leverages the power of this service to provide simple collaboration, file storage, backup and team workspace solutions. It also supports seamless integration with existing local storage to create a hybrid cloud with centrally managed, unified access.

Jerry Huang, Gladinet's CEO, states, "A powerful use case involves attaching a local folder to HP Cloud Object Storage to provide secure, remote access to any desktop or mobile device. In this scenario, the local folder can be synchronized with the HP Cloud Object Storage regardless of where changes occur and because there is a local copy, the data remains accessible even when Internet connectivity is lost."

The ability to seamlessly replace traditional backup media with cloud storage further demonstrates the value of Gladinet's unified approach. Any third party backup application can send data to the cloud through the existing file system interfaces, making the cloud migration completely transparent to the application.

"We are excited by this opportunity to work closely with HP as they provide the technology we need to add value to our solutions. Using HP Cloud Services with the Gladinet Cloud provides the usability, reliability and performance that customers are looking for," stated Jerry Huang, Gladinet's CEO, "and our compelling free storage offer provides an incentive for new customers to come and see what we have to offer."
